Description

Board containing 4 high quality RELPOL relays. After connecting to Lan Controller v3/3.5/4 has the ability to turn on, off, reset each of the relays independently. Their status is indicated by LEDs. The main application is to control 4 electrical devices. The board is powered by LAN Controller and requires a supply voltage of 9-15V (in this range must be the Lan Controller supply voltage).

Technical specifications:

- Coil control voltage: 12V
- Number of relays: 4
- Relay contacts: NO, C, NC
- Contact material: AgSnO2
- Maximum load: 16A - for 250V AC (AC-1); 16A - for 24V DC (DC-1)
- Contact resistance: $\leq 100\text{m}\Omega$

The kit includes a control cable with plugs.
