

1. Package Contents

Thank you for purchasing PLANET 12-/24-Port Gigabit IEEE 802.3at PoE+ Managed Injector Hub. The descriptions of these models are shown below:

POE-1200G	12-Port Gigabit IEEE 802.3at PoE+ Managed Injector Hub (220 watts)
POE-2400G	24-Port Gigabit IEEE 802.3at PoE+ Managed Injector Hub (440 watts)
HPOE-1200G	12-Port Gigabit IEEE 802.3at PoE+ Managed Injector Hub (360 watts)
HPOE-2400G	24-Port Gigabit IEEE 802.3at PoE+ Managed Injector Hub (720 watts)

“PoE+ Managed Injector Hub” is used as an alternative name in this Quick Installation Guide.

- 1 -

Open the box of the PoE+ Managed Injector Hub and carefully unpack it. The box should contain the following items:

Model Name Package Item	POE-1200G	POE-2400G	HPOE-1200G	HPOE-2400G
The PoE+ Managed Injector Hub	■	■	■	■
Quick Installation Guide	■	■	■	■
Rubber Feet	■	■	■	■
Two Rack-mounting Brackets with Attachment Screws	■	■	■	■
Power Cord	■	■	■	■

If any item is found missing or damaged, please contact your local reseller for replacement.

2. Requirements

- Workstations running Windows XP/2003/2008/2012/Vista/7/8/10/11, MAC OS X or later, Linux, UNIX, or other platforms are compatible with TCP/IP protocols.
- Workstations are installed with Ethernet NIC (Network Interface Card)
- **Ethernet Port Connection**
 - Network cables -- Use standard network (UTP) cables with RJ45 connectors.
 - The above PC is installed with Web browser.

Note

It is recommended to use Chrome 98.0.xxx or above to access the PoE+ Managed Injector Hub. If the Web interface of the PoE+ Managed Injector Hub is not accessible, please turn off the anti-virus software or firewall and then try it again.

- 3 -

3. Starting Web Management

The following shows how to start up the **Web Management** of the PoE+ Managed Injector Hub. Note the PoE+ Managed Injector Hub is configured through an Ethernet connection. Please make sure the manager PC must be set to the same **IP subnet address**.

For example, the default IP address of the PoE+ Managed Injector Hub is **192.168.0.100**, then the manager PC should be set to **192.168.0.x** (where x is a number between 1 and 254, except 100), and the default subnet mask is 255.255.255.0.

3.1 Logging in to the PoE+ Managed Injector Hub

1. Use Chrome 98.0.xxx or above Web browser and enter IP address <http://192.168.0.100> (the factory default IP address or the one that you have just changed in web) to access the Web interface.
2. When the following dialog box appears, please enter the default user name and password “admin” (or the password you have changed via web). The web login screen in Figure 3-2 appears.

Default IP Address: **192.168.0.100**
 Default Account: **admin**
 Default Password: **admin**

Note

The following screen is based on the HPOE-2400G. For the POE-1200G/POE-2400G/HPOE-1200G, the web screen is the same as that of the HPOE-2400G.

3. After entering the password, the main screen appears as Figure 3-3 shows.

Figure 3-3: Web Main Screen of PoE+ Managed Injector Hub

The PoE+ Managed Injector Hub Menu on the top of the Web page lets you access all the commands and statistics the PoE+ Managed Injector Hub provides. The PoE+ Managed Injector Hub Menu always contains one or more buttons, such as “Auto Logout” options, “Refresh” and “Logout”.

4. Recovering Back to Default Configuration

- **IP Address has been changed or password has been forgotten**

To reset the IP address to the default IP address “192.168.0.100” or reset the login password to default value, press the hardware-based reset button on the front panel for about 10 seconds. After the device is rebooted, you can log in the management Web interface within the same subnet of 192.168.0.xxx.

Warning:
 This device is compliant with Class A of CISPR 32.
 In a residential environment this device may cause radio interference.

Energy Saving Note of the Device
 This power required device does not support Standby mode operation. For energy saving, please remove the power cable to disconnect the device from the power circuit. Without removing power cable, the device will still consume power from the power source. In view of Saving the Energy and reducing the unnecessary power consumption, it is strongly suggested to remove the power connection for the device if this device is not intended to be active.
